Mur Cycle Path

FROM GENTIAN TO RIESLING WINE.

The morning of a cycle holiday on the Mur Cycle Path begins with a look out of your hotel window. What do you see? Green hills and forests, for which Styria is famous, and small charming Austrian towns and villages. A little further along the route you meet the Mur every day and it accompanies you to Bad Radkersburg. The special thing about it: you're always travelling a little downhill on the Mur! The Austrian part of the Mur Cycle Path is 330 kilometres long and begins in St Michael in Lungau in Salzburg. On the seventh day of your cycling holiday you can watch the landscape change – from the mountainous Lungau to the lush green hills of Styria.

Details about cycling holidays on the Mur Cycle Path

DAY
1

Arrival in St. Michael im Lungau

Recommendation:

Trip to the Spring of the River Mur approx. 55 km

There is little traffic on the way along the river Mur to the national park town Muhr. From there, you will cycle uphill on a partly very steep route (gradients of 1 % and 19%) to the Stickler alpine hut. The last part of the way, you will walk to the spring of the river Mur on 1898 metres in altitude (about one hour hike). Then, you will ride your bike downhill back to St. Michael. Transfer possibilities depend on the weather and operate from the end of May at the earliest! Due to varying weather conditions, the information about transfer possibilities is subject to change.

DAY
7*Mureck – Bad Radkersburg and Departure or Extension*
| approx. 25 km

On the short final stage, you will find water of all kinds: the river Mur will guide your way, you can swim in Lake Röksee, you can visit the mineral water spring Peterquelle and relax in the thermal waters of Bad Radkersburg (historic old town with many different architectural styles!). At the end of the day: departure/return transfer; or you can extend your trip, which we recommend in our category A hotel, since the admission to the thermal bath in Bad Radkersburg is included in the price.

Tour character

From the spring of the river Mur to the Slovenian border, the Mur cycle path inclines by a total of 1,700 metres in altitude on a length of about 365 kilometres. From St. Michael to Bad Radkersburg you will cycle downhill another 870 metres in altitude. This clearly shows that the Mur cycle path mainly goes downhill. Some slight climbs have to be cycled during the first two stages but you will always find yourself on tranquil bike paths.
